

CARIB

Driving forward research in food science, innovation and processing.

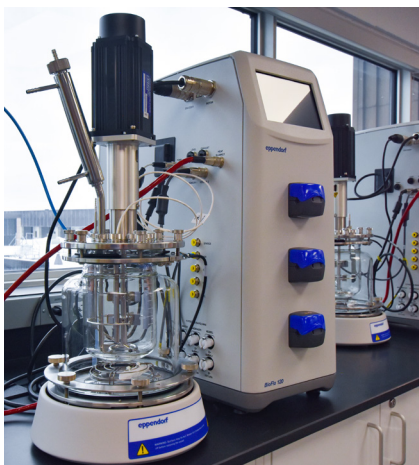

WHAT IS CARIB?

Fanshawe College's Centre for Applied Research and Innovation in Biotechnology (CARIB) labs are the new facility for industry-driven research in food science, innovation and processing.

Designed to accelerate new product development, encourage knowledge sharing and technology transfer in the food sector, and promote the development of a network within the industry.

CARIB TARGETS PARTNERS THAT NEED HELP WITH:

- product development
- manufacturing process
- quality assurance
- product testing

CARIB

We offer our technology and expertise on a per project or per-sample basis. Funding is available for eligible projects.

Speak to our research staff for more information on how we can partner with you.

ANALYSES

- fats, carbohydrates, protein, sugars, vitamins, minerals and trace elements
- food tracibility (PCR)
- food/product shelf life
- calories

SERVICES

- beverage fermentations
- CO2 extraction
- spray drying
- encapsulation of ingredients
