

# AIRCRAFT MAINTENANCE ENGINEER PROGRAMS

Are you enrolled, or planning to enroll, in an AME program at Fanshawe?  
You may need additional language support to succeed!

## EDUC-1105 | Strategies for AME Communication

This course is designed to support non-native speakers of English with the necessary language requirements to be successful in their Aircraft Maintenance Engineering programs (AAM4, AVI1, AVM4, and ASR1) at Fanshawe. Emphasis will be placed on sector-specific vocabulary acquisition, AME terminology and abbreviations, listening and reading comprehension, and effective communication skills, both oral and written.

## SKILLS

### VOCABULARY

Say and understand words essential for aircraft maintenance.

### COMPREHENSION

Complete tasks and processes given orally or in technical documentation.

### COMMUNICATION

Write and speak accurately and concisely to be understood in the classroom and industry.

### APPLICATION

Practice typical scenarios simulating common maintenance tasks and emergencies.

A high proficiency in these language skills will increase your chances of success in Fanshawe's AME programs and in finding a job in the industry.

## COURSE DELIVERY

- ▶ 45 hours of instruction (3 hrs/week for 15 weeks)
- ▶ Live, synchronous online instruction by faculty experts

To register, contact the Registrar's office at **1-800-717-4412** and request course code **EDUC-1105** OR visit [fanshawec.ca/educ-1105](https://fanshawec.ca/educ-1105) for online registration.
