

COMMERCIAL FLIGHT AND AVIATION LEADERSHIP

Are you enrolled, or planning to enroll, in the program, but *not quite ready to fly*?
You may need additional language support to succeed!

SPKG-1022 Aviation English – Preparation for CFAL

This course is designed to provide non-native speakers of English the speaking and listening skills necessary to be successful in the Commercial Flight and Aviation Leadership program at Fanshawe College. It is specifically designed to improve skill in each of the following areas for student success in preparation for career success as a pilot.

SKILLS

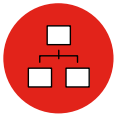

VOCABULARY

Say and understand words related to aviation and general contexts.

PRONUNCIATION

Develop clear and understandable speech using standard aviation pronunciation.

STRUCTURE

Use proper spoken grammar to communicate meaning clearly.

FLUENCY

Speak smoothly with natural rhythm and flow, using pauses when appropriate.

COMPREHENSION

Understand what is said in new and unexpected situations.

INTERACTION

Manage conversations naturally by using strategies to deal with routine procedures, emergencies and misunderstandings.

A high score in all six of these language skills will increase your chances of success in the Commercial Flight and Aviation program and on the formal aviation language proficiency demonstration, and in finding a job in the industry.

Low ability in any of these skills will prevent students from completing the program and of being employed as a pilot.

TESTED LANGUAGE PROFICIENCY

Expert

Students who achieve expert language proficiency do not need to take further language tests. Aviation companies prefer to hire people with this level.

Operational

Achieving this score allows students to fly. However, they must take the test again until they reach the **EXPERT** level.

Below Operational

Students with this score are not allowed to fly in Canada, even for learning purposes. They will not participate in flying activities for class.

COURSE DELIVERY

- ▶ 60 hours of instruction (4 hrs/week for 15 weeks)
- ▶ Live, synchronous online instruction by faculty experts
