

FANSHAWE

Faculty of Health, Community Studies and Public Safety

PLEDGE OF CONFIDENTIALITY AND ACCOUNTABILITY

This statement is adapted from the “Code of Practice” for safeguarding health information as approved by the Canadian Health Record Association and applies equally to all persons in Canada who handle and have access to health information and records, whether or not the person is providing direct care to clients of the institution or agency. The statement refers to all confidential client and corporate/workplace information in the case of the Health Sciences, Human Services and Nursing Programs.

I understand and agree that in the performance of my duties and my attendance as a student of Fanshawe College assigned for learning experience in any school, hospital, other health care institution, social service agency or other field placement, I must hold client information in confidence, and I agree not to disclose confidential information to any person other than those under whose direction and control I am.

Further, I agree to adhere to the regulations, policies and procedures required for employees of such institution or agency while receiving these learning experiences.

The simulation labs are a learning environment which provides an opportunity to rehearse assessment and intervention in client/patient care in a simulated setting. Appropriate behavior for a clinical/field setting is to be modeled in the lab.

I understand the significance of maintaining confidentiality with respect to patients/clients, simulated patients/clients, fellow students, agencies and faculty around events involving scenario performance and debriefing sessions in the simulation lab, classroom and/or placement.

I understand that any breach of such confidence, intention or unwitting violation of institution or agency regulations, policies or procedures may be considered as “cause for dismissal from my program in Health Sciences, Human Services and/or Nursing”.
