Tourism and Travel

The Program

Tourism and Travel is recommended for students with a keen interest in people, students who display effective speaking and writing skills and students who have developed personal responsibility and leadership skills in school, community and social organizations.

The Content

Course material includes marketing, travel fundamentals, world tourism geography, customer sales and service, package holidays, tariffs and ticketing, group tour management, surface transportation studies and computer systems. There are also professional insight courses and front office studies.

The Outcomes

The program is designed to ensure that graduates meet the standards and qualifications endorsed by the Association of Canadian Travel Agencies (ACTA). Students will be given the opportunity to write the Travel Industry Council of Ontario (TICO) exam upon successful completion of this program.

Many employers feel today’s graduates have no concept of the “real” world of work; we are providing this experience in Co-operative Education. Any job that gives the student related background in your business would be suitable. Eligible employers can claim a tax credit for each qualifying work placement for up to $3000.

Co-operative Education students are ultimately looking ahead to careers in businesses such as yours. For this reason they are not expecting to simply put in time on the job, but are eager to get involved and make a worthwhile contribution. Participation in co-operative education also gives the employer the opportunity to try out a student's capabilities without obligation or commitment to permanent employment.

This work oriented educational system integrates classroom study and paid, on-the-job work experience, by alternating periods in College with periods of employment by co-operating organizations.

The working experience will ideally increase in difficulty and responsibility as the student progresses academically. However, the College realizes it is often difficult in practice to do this.

It is essential that the work experience be a normal one; that the student be treated like a regular company employee so that a realistic picture of the working environment in that field may be obtained. Perhaps most important is what students gain from the working experience, i.e. an attitude for success and the ability to get along with co-workers at all levels.
